Fairwinds | **DATADOG**

Datadog & Fairwinds Insights: A Powerful Combination

Protect, optimize, and monitor your mission-critical Kubernetes applications

CONTINUOUS KUBERNETES VISIBILITY

Datadog offers a monitoring platform for cloud applications. By seamlessly aggregating metrics and events across the DevOps stack, Datadog delivers full visibility into modern applications.

Datadog provides reactive observability, helping users improve performance, identify problems, and analyze logs. This real-time monitoring and observability helps organizations **react quickly to system issues**.

Fairwinds Insights, available in the Datadog marketplace, **provides proactive observability, helping prevent Kubernetes problems** by:

- Providing consistency across teams and Kubernetes clusters
- Uncovering security, efficiency, and reliability misconfigurations
- Applying Kubernetes best practice policies automatically
- Enforcing policies to maintain compliance across containers and Kubernetes clusters
- Enabling service ownership by shifting left into Git and CI/CD to identify misconfigurations early

PREVENT PROBLEMS

Fairwinds Insights prevents future problems while Datadog monitors problems at runtime.

BUILD → **DEPLOY** → **RUN**

Fairwinds

DATADOG

DATADOG AND FAIRWINDS INSIGHTS

Get the visibility and control you need to make your applications more reliable and secure with end to end monitoring for your Kubernetes and cloud applications. Fairwinds Insights integrates with Datadog so you have a single location to view all of your reports. Now you can:

- Define and control custom policies across multiple clusters

- Monitor and optimize Kubernetes costs based on visibility into usage and estimated costs

- Integrate Kubernetes configuration recommendations into Datadog dashboards

- Reduce risk by monitoring containers for known vulnerabilities

WHY FAIRWINDS

Fairwinds is your trusted partner for Kubernetes security, policy and governance. With Fairwinds, customers ship cloud-native applications faster, more cost effectively, and with less risk. We provide a unified view between dev, sec, and ops, removing friction between those teams with software that simplifies complexity. Fairwinds Insights is built on Kubernetes expertise and integrates our leading open source tools to help you save time, reduce risk, and deploy with confidence.
