

QUICK CHECKLIST

Is Kubernetes right for you and can you manage it in-house?

QUESTION	YES	NO
Do you need scalability and high availability?	<input type="checkbox"/>	<input type="checkbox"/>
Does downtime significantly impact your business?	<input type="checkbox"/>	<input type="checkbox"/>
Are cloud costs a concern for your finance team?	<input type="checkbox"/>	<input type="checkbox"/>
Can your team handle frequent Kubernetes updates and potential security and configuration issues?	<input type="checkbox"/>	<input type="checkbox"/>
Do you have Kubernetes experts on your in-house team?	<input type="checkbox"/>	<input type="checkbox"/>
Would outsourcing Kubernetes management free up your developers' time to focus on your business differentiators?	<input type="checkbox"/>	<input type="checkbox"/>

If you checked "Yes" to questions one through three, Kubernetes could be a great fit for your organization. If you checked "No" for questions four through six, consider bringing in a Managed Kubernetes-as-a-Service provider to help you make the most of Kubernetes.

Want to focus on your core business, not your infrastructure? Fairwinds provides the people and technology to deliver secure, reliable, and efficient platforms. [Start a Conversation.](#)
